FROM

Saafir Hale

Data Analyst

Dear Reader,

My name is Saafir Hale. I'm a data enthusiast looking to bring my data and analytical skills to drive business decisions while maintaining data pipelines as a Software Data Analyst. I am a geek with data and to work as a data analyst is a mission of mine.

The job posting cited that you are looking for a software data analyst skillful with Excel, SQL, Tableau, Data Visualization, Data Scraping, and Python. I have experience in multiple programming languages and data analysis tools. My passion for data helped me work on private data analyst projects. I have also achieved the following:

- Completed Google Data Analytics Professional Certificate and gained skills in SQL and R.
- Studied in the University of Michigan Sports Performance Analytics Specialization Certificate and learned Python and Predictive Modeling in Sports.
- Achieved 10 Kaggle Certifications: Python, Pandas, Geospatial Analysis, Data Cleaning, SQL, Data Visualization, Machine Learning,
- Studied Mark Miller's ServiceNow Administrator and ServiceNow Developer courses to learn Application and Software development.

I'm excited about the chance to use my experience with data and software development to fuel business decisions, maintain data pipelines, and translate complex data into clear and actionable insights. I would love to continue to develop my skills and knowledge. I can be reached by phone, zoom, or email to discuss how I can help with improving engineering processes and work with a group of like-minded individuals.

Thank you for the consideration,

Saafir Hale, Data Analyst
